

# New in 2010

## From AccuStandard

In addition to the widest selection of organic, inorganic and petrochemical Chemical Reference Standards available as catalog products, AccuStandard also offers custom formulations to meet unique requirements or specific laboratory needs. Most catalog products can be shipped within 10-12 days the order is placed and our knowledgeable staff is available to answer any questions regarding our products.

AccuStandard is proud to announce that we have added even more products to our ever-expanding product line:

- **PBDEs Congeners** - Our synthesis department has produced an additional 20 congeners, bringing the total available to 205 – just 4 short of the possible 209.
- **PBDE Metabolites and Derivatives** - They have also synthesized 20 additional methoxy and hydroxy PBDEs, as well as several more fluorinated PBDEs, which are ideal for use as internal standards.
- **22 new industrial flame retardants** identified as emerging “new” brominated flame retardants referenced in a study commissioned by the Norwegian Pollution Control Authority.
- **New EPA Method 524.3 Drinking Water Standards**
- **New EPA Chicago Regional Laboratory (CRL) environmental methods:**
  - CRL-MS014 Series
  - CRL-MS015 Series
  - CRL-MS016 Series
- **Consumer Product Safety Commission (CPSC) Phthalate method.**
- **30 new pesticides** including:

• Dimethenamide-P	• Emamectin-benzoate
• Quinoxifen	• Novaluron
• Fluroxypyr	• Indanofan
• Oxabetrinil	• Quinoclamine
- Proposed standards to meet the **new ASTM environmental methods:**
  - D7599-09 Ethanolamines
  - D7574-09 Bisphenol A (BPA)
  - D7485-09 Nonylphenols, Nonylphenol Ethoxylates & Octylphenol
  - D7065-06 Nonylphenols & Octylphenol & BPA
  - D7600-09 Carbamates
  - D7597-09 Organophosphonates
  - D7598-09 Thiodiglycol (TDG)
